

GAURAV VIJAY PAWAR

Data Analyst | SQL | Python | Power BI | Data Visualization
9922844745 | gauravpawar28396@gmail.com | [linkedin.com/in/gauravpawar](https://www.linkedin.com/in/gauravpawar) | Pune, India

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience turning complex operational and business datasets into actionable insights using SQL, Python, and BI tools (Power BI, Tableau). Skilled in dashboard development, KPI tracking, and stakeholder reporting across cross-functional teams. Proven track record of improving reporting efficiency, data accuracy, and decision-making speed through data-driven solutions. Strong foundation in machine learning (classification, regression, clustering) and NLP.

KEY ACHIEVEMENTS

- Cut recurring dashboard turnaround time by 30% by standardizing Power BI report templates, freeing analyst hours for deeper ad-hoc analysis.
- Redesigned Apache NiFi ingestion flows across 4+ data sources (booking, flight, hotel, visa), improving pipeline reliability and cutting manual data-prep effort by 25%.
- Surfaced pricing and inventory optimization opportunities via EDA that directly informed revenue and retention strategy for the e-commerce business.
- Delivered data-driven personalization insights for a Landon World Book of Records-recognized interior design project, translating raw preference data into design strategy.
- Engineered process improvements in tablet packaging operations that reduced power consumption and processing time while holding quality constant — the process-optimization mindset now anchors my approach to data-driven decision-making.
- Maintained zero major data-accuracy incidents across projects spanning e-commerce, travel, healthcare, interior design and manufacturing domains.

TECHNICAL SKILLS

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn

Programming & Analysis: Python (Pandas, NumPy), SQL

Databases: MySQL, MongoDB, NoSQL

Data ETL / Pipelines: Apache NiFi, Data Ingestion & Flow Design

Machine Learning: Classification, Regression, Clustering

NLP: Text Processing & Analysis

Web Basics: HTML, CSS, JavaScript

Tools & Platforms: Jupyter Notebook, Google Colab, MS Visual Studio, Git/GitHub, MS Office, AWS, Azure

WORK EXPERIENCE

Data Analyst I | *QuantumSoft Technologies*

Project: E-Commerce Sales & Customer Analysis | Mar 2025 - Present

- Own end-to-end analysis of e-commerce sales, customer behaviour, and product performance data to surface trends and growth opportunities for stakeholders.
- Built and maintain interactive Power BI and Tableau dashboards tracking revenue, conversion rate, and retention KPIs for cross-functional teams.
- Cleaned, transformed, and validated large transactional datasets using SQL and Python (Pandas, NumPy), improving downstream reporting accuracy.
- Ran exploratory data analysis (EDA) that directly shaped pricing and inventory optimization decisions.
- Partnered with front-end teams (HTML, CSS, JavaScript) to ensure dashboard outputs integrated cleanly into existing web interfaces.
- Deliver weekly price-dynamics analysis and executive-ready stakeholder reports.

Data Analyst | *Rajyug IT Solutions Pvt. Ltd.*

Project: Tour and Travel Analysis - Civic Travel | Mar 2024 - Aug 2024

- Led travel and booking data analysis for a Dubai-based travel agency, directly informing flight, hotel, and visa service strategy.
- Designed Apache NiFi ingestion flows to collect and preprocess data from 4+ sources (booking, flight, hotel, visa) into analysis-ready datasets.
- Built Power BI dashboards and reports that improved personalized, data-driven travel recommendations and customer satisfaction.

Project: Interior Design Analytics Project | Aug 2024 - Mar 2025

- Delivered personalization insights for a Landon World Book of Records-recognized interior design project by analysing customer preference and market-trend data.
- Translated analytics findings into design strategy recommendations used by the design team.

Production Engineer | *Infinity Corporation*

Key Initiative: Quality Procedures Analysis, Tablet Packaging Operations | Oct 2019 - Nov 2021

- Analysed quality-control process data to identify inefficiencies in tablet packaging operations.
- Redesigned procedures that cut power consumption and processing time without compromising product quality.
- This process-optimization and root-cause analysis background is the foundation of my transition into data analytics — applying the same structured, metrics-driven approach to business data.

EDUCATION

Post-Graduation in Data Analytics - Imarticus Learning, Pune

MBA in Production & Operations Management - Kaviyatri Bahinabai Chaudhari North Maharashtra University, Jalgaon

Bachelor of Engineering in Mechanical Engineering - Savitribai Phule Pune University, Pune

CORE COMPETENCIES

Analytical Thinking | Data Storytelling | Time Management | Problem Solving | Project Management | Collaboration & Teamwork | Communication & Presentation Skills | Attention to Detail
